

# Building the SDG Bridge

## Recover Better Support Fund

### The Challenge

**Missing Links at Local and National Level:** In 2018, the Kosovo Assembly established a Sustainable Development Council to promote the Sustainable Development Goals (SDGs) nationally and locally. However, the concept of SDGs at the local level is still new. Moreover, many policies are not sufficiently coordinated between the central and local levels. More needs to be done in systematically integrating goals and combining SDGs indicators and targets with Municipal Development Strategies.

**The Potential of the SDGs:** The SDGs can serve as framework and instrument for evaluating policy planning and development progress on national and local level. The momentum during COVID-19 is specifically important to ensure that new policy packages and recovery plans are also utilized to include SDGs.

### The Objective

The main objective is to enshrine the SDGs in the COVID-19 recovery policy framework of Kosovo. By promoting localization, implementation, and monitoring mechanisms at the local level, a bridge of communication and support is built between central level policies and local initiatives.

### The Target Group

At the central level, INDEP works closely with the Council for Sustainable Development and Green Caucus in the Assembly of the Republic of Kosovo.

At the local level, INDEP works intensively with four selected municipalities. At the same time, the Association of Kosovo Municipalities is a target group.

Project name	SDG Bridge – Connecting Local and National Actors for Sustainable Development
Commissioned by	Federal Ministry for Economic Cooperation and Development (BMZ)
Country	Kosovo
Implementing Organisation	Institute for Development Policy (INDEP)
Duration	November 2021 – April 2023

### The Approach

**Intensive Research Work and Advocacy Efforts:** INDEP meets institutions of central and local levels regularly to contribute to comprehensive research work. INDEP also conducts desk research and literature reviews to provide comparative examples of how to improve the economic, social and environmental situation in Kosovo.

**Capacity Building and Joint Workshop:** Four municipalities are engaged in an Inter-municipal Sustainability Hub that provides an opportunity for municipal officials to expand their knowledge on the 2030 Agenda and the SDGs. The Hub is conducted in Albania as a study visit to enable participants from foreign municipalities to exchange knowledge and learn from a

Voluntary Local review, that was conducted in an Albania municipality previously. In addition, five roundtables will engage participants and other community members in direct discussions with central level representatives. A joint workshop between the National SDG council and the Association of Kosovo Municipalities sets the basis for joint collaboration between the actors.

**Awareness-raising Campaign:** The results of the activities so far and further information about the 2030 Agenda are presented in two videos on social media. A podcast series will also be launched on seven radio stations to inform citizens on ways they can engage themselves in local initiatives that promote SDGs. In addition, the first SDG tracking software platform of the municipality of Drenas will be maintained and enriched.

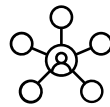

## Achieved Results

8 research reports with more than 50 recommendations advocating the 2030 Agenda were conducted

209 people attended five roundtable discussions of Kosovo's SDG Council and the Association of Kosovo Municipalities

55 municipal officials participated in the "Inter-municipal Sustainability Hub" and expanded their knowledge on the 2030 Agenda and the SDGs

2 audio-visual materials and 7 podcasts on the SDGs were produced and shared via social media and radio stations

## About INDEP

The Institute for Development Policy (INDEP) is a think tank and an advocacy centre established in 2011. As an association of policy analysts, researchers, and civil society activists it provides independent research-based policy solutions.

Its mission is to strengthen and guide sustainable socio-political and economic development based on the principles of democracy and democratic values, equal opportunities, social and environmental justice, and human rights.

The Recover Better Support Fund supports efforts designed and implemented in partner countries to recover from the impacts of the COVID-19 pandemic with the goal of building more resilient, inclusive, and sustainable societies while advancing the 2030 Agenda. For that purpose, it deploys two funding lines: (1) Sustainable development advisory bodies and (2) leaving no one behind and strengthening socio-economic resilience. Commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ), it supports 23 projects in 16 countries worldwide with up to 180.000 EUR.

GIZ implements the Recover Better Support Fund. For further information, please visit [www.recoverbettersupportfund.com](http://www.recoverbettersupportfund.com) or contact the funds team at [recoverbetterfund@giz.de](mailto:recoverbetterfund@giz.de)
